SUMMARY

Software Developer with experience building and maintaining scalable web applications using the MERN stack and Next.js. Skilled in developing responsive user interfaces, designing RESTful APIs, optimizing application performance, and implementing technical SEO and web analytics. Experienced in maintaining production websites, integrating third-party services, and collaborating across teams to deliver reliable, user-focused solutions.

EXPERIENCE

Software Developer (Intern) - Finvision

[link](#)

- Implemented technical SEO best practices, including metadata optimization, structured data, XML sitemaps, robots.txt configuration, and canonical URLs to improve search engine visibility.
- Optimized page performance using Server-Side Rendering (SSR), image optimization, lazy loading, and code splitting to improve Core Web Vitals.

VT on Python AI - Techonet Private Limited

[link](#)

- Gained practical knowledge in debugging code using browser tools and managing versions with Git.
- Deepened understanding of web architecture by learning how HTML, CSS, and JavaScript work together.

PROJECTS

Emotion-Based Music Recommendation

[link](#)

- A Python and Streamlit-based web application that detects a user's real-time emotion from facial expressions and text sentiment using computer vision and ML models, then recommends mood-aligned songs by mapping emotions to curated playlists via YouTube APIs.
- Tools Used: Streamlit, NumPy, Keras, OpenCV, AV Library.

SplitMate - Smart Expense Splitting Application

[link](#)

- Designed and developed a full-stack expense management platform that simplifies bill splitting among friends, roommates, and teams.
- Implemented user authentication, group creation, expense tracking, balance calculation, and settlement history using the MERN stack. Developed RESTful APIs and integrated MongoDB for efficient data storage and retrieval.

Employee Management System

[link](#)

- Developed a full-featured Employee Management System from scratch using React.js and modern JavaScript (ES6+), implementing core CRUD (Create, Read, Update, Delete) operations for employee records.
- Tools Used: React.js, React Hooks, React Router.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, C++, HTML
- **Database:** SQL (MySQL), NoSQL (MongoDB)
- **Frameworks:** React.js, Node.js, Express.js, Bootstrap, Tailwind CSS
- **DevOps & Deployment:** Docker, Vercel, Render
- **Developer Tools:** Git, GitHub, VS Code, Postman, MongoDB Compass, RESTful APIs

EDUCATION

Christian College of Engineering and Technology

Sept 2022 – May 2026

B.Tech in Computer Science & Engineering

- CPI: 7.6/10
- Coursework: Data Structures and Algorithms, DBMS, OOPs, Operating Systems, Computer Networks.

CERTIFICATIONS

- Artificial Intelligence Certification
- Web Development Certification
